Use the Desktop Recorder

The application allows you to capture webcam video, your screen, your voice, or all three.

Click here for a video demonstration of the controls.

- **WEBCAM: r**ecord video from your webcam
- **SCREEN:** record the screen
- **AUDIO:** record audio

Click each option to select or deselect it before you begin recording. If an option is white and has a line through it, it has been deselected and will not be recorded. Click it to reactivate it.

The Webcam and Screen options can also be switched to record other screens or webcams; simply choose your desired source from the dropdown menu to the right of each one.

1. To start the recording, click the red (circular) Record button. The controls will minimize to the bottom right corner of your screen

2. To stop the recording, click the (square) **Stop** button

3. In the Entry screen that appears, title your video and give it a description and tags, if desired

4. To save the recording to your computer only, click **Save**

5. To upload it to your My Media, click **Save & Upload**; your new entry may take several minutes to appear
